## **DETAILED ACTION**

1. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to **Group Art Unit 1648.** Applicant's preliminary amendment filed March 20, 2002 is acknowledged and entered. Note that claims 45-48 are not present in the specification. Page 72 has claims 34-44, and page 73 has claims 49-51. According to CFR 1.126, claims 49-51 have been renumbered and will be referred to as claims 45-47. Cancelled claim 50 was renumbered as claim 46 and cancelled. Claims 1-41, 43-45 and 47 are pending.

## Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- Group I, claims 1-16 and 20-21, 24-29, 32-33 and 47, drawn to a method of modifying a producer cell, the resulting producer cell, and a method of using the producer cell, wherein the method is a recombinase assisted method.
- Group II, claim 17, drawn to a retroviral particle.
- Group III, claims 18-19, 22-23, 30-31, 34-44 and 47, drawn to a producer cell and method of using a producer cell, wherein the method does not require the recombinase assisted method.
- Group IV, claim 45, drawn to a nucleic acid vector.

Application/Control Number: 10/088,076

Art Unit: 1648

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The asserted special technical feature, a recombinase-assisted method of modifying a producer cell, is not shared by all three groups. Group II is drawn to a retroviral particle produced by the producer cell. Group II is a product-by-process claim, and therefore the process is not given patentable weight. The cell and related methods of Group III do not require the recombinase-assisted method of modifying a producer cell. Group IV depends from a non-existent claim, and therefore lacks the special technical feature. Claim 47 is drawn to a method and/or a producer cell "as described herein"; claim 47 will be examined with either Group I or Group III, pending Applicant's election. Therefore, the invention lacks unity because the Groups do not share a special technical feature.

## Conclusion

Papers relating to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 located in Crystal Mall 1. The Fax number for Art Unit 1648 is (703) 308-4426. All Group 1600 Fax machines will be available to receive transmissions 24 hrs/day, 7 days/wk. Please note that the faxing of such papers must conform with the Notice published in the Official Gazette, 1096 OG 30, (November 15, 1989).

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Stacy B. Chen, whose telephone number is (703) 308-2361. The Examiner can normally be reached on Monday through Friday from 7:30 AM-4:00 PM, (EST). If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's Supervisor, James C. Housel, can be reached at (703) 308-4027. Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0196.
